

# Abdulrahman Tamassili Khanji

Backend Engineer | Riyadh, Saudi Arabia (Open to Relocation) | Lebanese (Valid Iqama) | DOB: May 2002  
+966-55-373-8706 | [a.khanji.2025@gmail.com](mailto:a.khanji.2025@gmail.com) | [linkedin.com/in/abdulrahman-tamassili-khanji](https://linkedin.com/in/abdulrahman-tamassili-khanji) | [akhanji.dev](https://akhanji.dev)

Software Engineer with experience building production-ready web applications across backend and full-stack development. Passionate about designing secure, scalable, and maintainable software that transforms business requirements into reliable solutions. Experienced in developing REST APIs, optimizing databases, integrating AI into business applications, and delivering features that improve user experience and create measurable business value. A fast learner who quickly adapts to new technologies while writing clean, maintainable code.

## Technical Skills

**Programming Languages:** C#, Python, JavaScript, TypeScript, SQL, HTML5, CSS3  
**Backend & Architecture:** ASP.NET Core, Node.js, FastAPI, REST APIs, Microservices, Clean Architecture, System Design, SOLID Principles  
**AI & Data Integration:** RAG, OpenAI, Google Gemini, Multi-Agent Systems, AI CLIs (Cursor, Antigravity, Claude Code), Local LLMs, Prompt Engineering  
**Databases & Caching:** PostgreSQL, SQL Server, Supabase, MongoDB, Redis, Query Optimization, Schema Design  
**Cloud & DevOps:** AWS, Hetzner Cloud, Docker, Cloudflare, Linux Server Administration, UFW Firewall, Git, Postman, Swagger  
**Frontend & UI:** Angular, Ionic, Tailwind CSS, GSAP, UI Animations  
**Security & Auth:** JWT, OAuth2, Role-Based Access Control (RBAC), Row-Level Security (RLS), Vulnerability Mitigation

## Work Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                  |
